Dear Colleagues,

It is our pleasure to welcome you to the **Gulf Aorta Summit (GAS) 2027**, which will be held from **29-31 January 2027** at **Jumeirah Emirates Towers, Dubai, UAE.**

This prestigious event is organized in collaboration with worldwide societies, associations, and educational institutions, working hand in hand to build GAS 2027 as a recognized international hub of expertise in the field of **aorto-cardiovascular diseases**. We are proud to present the **fifth wave of the International Gulf Aortic Summit (GAS 2027)**, a globally recognized event in this specialty.

The event will be conducted in two formats:

- A two-day CME-accredited expertise scientific programme, and
- **Pre-summit workshops** on **29 January 2027**

GAS 2027 proudly represents the **largest aortic-focused event in the GCC region**, featuring a comprehensive three-day program that addresses management approaches, current challenges, and emerging trends in **aortic aneurysm diseases**. The program aims to enhance awareness and deepen understanding through the valuable contributions of highly esteemed local and international expert faculty. Many world-renowned speakers will share their expertise and clinical experience.

The high level of scientific content will be delivered through expert lectures, complex case discussions, interactive panel discussions, and will culminate in masterclasses and hands-on workshops. In addition, to keep the community up to date with the latest innovations in management approaches, GAS industry partners will present the latest developments and technical specifications of aorto-vascular graft devices through dedicated industry symposia.

All attendees will have the opportunity to share experience, update their knowledge and contribute to complex aortic aneurysm case management — in live transmission streaming from the hybrid angio-operating room to the conference hall, in high-quality two-way transmission.

As an attendee, you will benefit from a combined view of conference discussions alongside wide-angle live coverage of the operating room during procedures.

All of these collective efforts are geared towards paving the way for a successful International Gulf Aorta Summit — GAS2027, an event meticulously designed to illuminate the future of safe, comprehensive aortic aneurysm disease management and to help predict future outcomes.

We hope that, by working together, we will further strengthen and unify the best management options for aortic aneurysm disease.

Welcome — we look forward to you joining your colleagues at the **Gulf Aorta Summit, GAS2027.**

BOARD OF DIRECTORS

GAS Chairman
Prof. Arif AlNooryani

Dr. Zaki Khalifa Almuzakki Alshamsi
GAS Chief Director

Prof. Bander Aldhafery
Chair of Summit Platform, Professional Advisors

Prof. Adel Aswad
Chair, Board of Organizers

Dr. Sharif Khashaba
Director of Partnership and Collaboration for Lead Organizers

Dr. Hussein Ahmed Lateef
Chair of Scientific Advisory Board

Dr. Adel Al-Ali
Director of Global Educational Strategies and Illustration of GAS

Dr. Faisal Alam
Director of Summit Platform Development

Prof. Hazim El Beyrouti
Director of Congress Development & Stakeholder Engagement

Dr. Obaid Al Jassim
Director of GAS Legacy & Institutional Development

Dr. Ayman Al Sibaie
Director of GAS Training Program and Masterclasses

Dr. Ali Mohammed Jawaz
Director of Professional Standards Committee

Prof. Payman Majd
Chair of Professional Advisory Board

Dr. Bassel Safi
Director of Global Development and Researches Committee

BOARD OF ORGANIZERS

Setting the direction for GAS 2027

The individuals steering the Gulf Aorta Summit — from founding vision to scientific direction — drawn from leading vascular and endovascular centres across the Gulf and internationally.

Prof. Adel Aswad
Chair, Board of Organizers

Prof. Samer Koussayer
Board of Organizers
Co-Director & Gulf Aorta Board Coordinator

EDUCATIONAL OUTCOMES

At the end of the Summit, participants will be professionally acknowledged for their ability to:

- Identify evolving management approaches in complex aortic diseases
- Recognize aggressive strategies involving open and endovascular surgery
- Discuss post-operative surveillance and expectations for new procedures
- Identify innovative techniques in aortic aneurysm surgery

OUR MISSION

TheGulf Aorta Summit (GAS) is an international hub of expertise, bringing together leading experts from around the world to promote knowledge across various aortic aneurysm diseases and appropriate surgical and interventional management approaches.

The GAS Summit is a hybrid event, crafting intelligent experiences under the theme "Aorta: An Organ of Change – Inspiring Solutions for Global Aortic Disease Management," following the remarkable success of previous Gulf Aorta conferences.

The congress facilitates the sharing of experiences with highly esteemed and renowned international experts, encourages meaningful discussions, builds consensus, and helps shape the future of safe aortic disease management.

The GAS Congress creates educational initiatives and offers a premier scientific platform for an international audience, encouraging clinicians who aim to enhance their skills, engage with experts, and showcase pioneering ideas.

The GAS Congress will delve into cutting-edge research and explore groundbreaking advancements in aortic disease treatment, driving valuable professional and academic growth.

The core mission of this meeting is to raise awareness within cardiovascular and radiology specialties regarding aortic diseases by sharing clinical and therapeutic research, contributing alongside global aortic conferences toward best and safest management practices, and promoting discussion of novel treatments for complex aortic diseases and their complications.

TARGET AUDIENCE

- Thoracic Surgeons
- Vascular Surgeon
- Cardiovascular Surgeons
- Advanced Cardiovascular Practitioners
- Cardio-Thoracic Surgeons
- Vascular Interventional Radiologists
- Surgical Trainees
- Interventional Cardiologists
- Cardiologists
- General Surgeons
- Angio/Cath Lab Technologists
- Anesthesiologists
- Critical Care Physicians
- Sonographers and Cardiovascular
- Imaging technologists
- All Allied Health Professionals
- Emergency Department professionals
- Critical Care Personnel
- Radiology
- Public health officers
- Risk Management Professional
- Healthcare providers and Occupational Health
- Environmental Health & Safety

SESSION FORMAT

- Life Thorathic Surgeries
- Keynote Talks
- Scientific Sessions
- Panel Discussion and Debate
- Hand on Expertise Workshops
- Aortic Master Courses
- Meeting the Experts
- Case based Discussions
- Posters Presentation and Discussion
- Industry-Sponsored Symposia
